SUMMARY

Senior Fullstack & Blockchain Developer with 6+ years building web, mobile, and decentralized applications. Delivering scalable and high-performance products across startups and enterprise environments. Strong expertise in modern frontend technologies with a focus on performance, usability, and clean architecture.

SKILLS

Languages: HTML5, CSS3, JavaScript, Typescript, Rust
Frameworks: React.js, React Native, Next.js, Remix.js, NestJS, Node.js, Express.js
Databases: MongoDB, PostgreSQL, SQLite, Supabase, Firebase
API Design: REST API, GraphQL, OpenAPI/Swagger
DevOps: AWS, Azure, Docker, CI/CD (Jenkins, Github Actions/Hooks)
Architecture: Microservice, Monorepo
Tools: Git, Webpack, Vite, Babel, NPM, ESLint & OXlint, TailwindCSS, CSS Modules, SASS/LESS, React Query, Redux, Zustand, Zod
Blockchain: ethers.js, web3.js, viem, wagmi

EXPERIENCE

Mar 2023 — Mar 2026 (Contract, Remote)

Fullstack Developer (Blockchain) — InLeo

United States

- Developed features for a multi-chain decentralized exchange and social media platform built on the Hive blockchain, contributing to a DEX processing **~\$10M in monthly trading volume**.
- Designed and built a SaaS-based Web3 Wallet and Multi-Chain DEX SDK enabling third-party applications to integrate blockchain trading across 50+ blockchains — **adopted by 2+ integrators collectively processing \$50M+ in monthly volume**.
- Built high-performance **WebSockets** for real-time trading and scalable frontend components using **Next.js, React, and TanStack Start** improving application responsiveness.
- Implemented backend services with **Node.js and Rust** to support blockchain interactions and transaction processing/tracking.
- Integrated **MongoDB and PostgreSQL** for scalable data storage across social and trading modules.

Oct 2022 — Feb 2024 (Full-Time, Hybrid)

Frontend Team Lead (Blockchain) — Balance Network

Istanbul

- Led frontend development across multiple crypto products like Centralized Exchange, Launchpad, NFT Marketplace, and Wallet Interface.
- Managed and mentored a team of 5 frontend developers while defining architecture and development standards.
- Built scalable and performance oriented interfaces using **Next.js, React, and React Native** for both web and mobile platforms.
- Conducted regular code reviews and introduced Agile practices across a cross-functional team, maintaining development velocity and code quality standards.

Dec 2021 — Jul 2022 (Full-Time, Remote)

Frontend Team Lead — Cyou Live

Izmir

- Led frontend development of social learning web and mobile applications used for online education.
- Architected responsive interfaces using **Next.js and React** with modular styling via **SCSS and CSS Modules**.
- Built mobile application that streams real-time group video calling with raw **WebRTC** using **React Native** and **Expo**.

Sep 2021 — Dec 2021 (Full-Time, On-Site)

Frontend Developer — IDEA Learning Solutions

Istanbul

- Implemented frontend features for a **React** based e-learning platform used by teachers and students.
- Built an interactive course editor used by **10K+ daily users**, enabling educators to create and manage learning content flawlessly.

Nov 2020 — Sep 2021 (Full-Time, On-Site)

Frontend Developer — Lizbon Creative

Istanbul

- Developed UI interfaces for **B2B SaaS applications** across multiple client projects.
- Transformed **50+ Figma designs** into pixel-perfect interactive applications.
